Optimization of Linear Discrete Systems: An Approach to the Staircase Problem (Classic Reprint) (Paperback)

By Hubert Tavernier

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Optimization of Linear Discrete Systems: An Approach to the Staircase Problem We are concerned with the study of the optimization of a stationary staircase problem, mixing in our approach, the concepts of mathematical programming and optimal control. Some results are first derived about feasibility and controllability as a greater understanding of system behavior. We then look at the optimization using a dynamic programming approach to show that we can theoretically reformulate our problem as a decoupled optimization problem. Suggestions are made to take advantage of this fact in designing practical algorithms. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain...
