

## Ohio Cultivator Vol.XVIII January 1,1862 No.1 (Paperback)

By Ohio Cultivator Vol XVIII January

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1862 Excerpt: .warm, light soil--juice is richer, and needs less boiling, giving a lighter colored syrup. The more vegetable matter in a given amount of juice, the darker the syrup, and the more difficulty in granulating. Agreed with Mr. Cory about letting cane stanl. Cane should be well matured. The vegetable matter then is turned to woody fibre, and is not left in sap. Green stalks give green tasting syrup. Less grape sugar in ripe cane. Must have warm soil in Michigan to mature the cane. O. N. Brainard, Lynn Co. Iowa-- Best soil is good high hazle, sandy or gravelly soil, sloping to the south or south-east. Cane grown on dark soil, if cut and kept, makes much lighter syrup than if worked up at once. Dark rich land should not be manured, but if any is used, let it be coarse straw manure. Horse manure should not...
