paperback. Book Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Pages Number: 217 Publisher: Higher Education Press Pub. Date :2008-01. This book is the general higher education Eleventh Five-Year national planning materials (higher vocational education). is based on the second edition of the teaching according to the reform of vocational education in the new situation and the characteristics of higher education amendments made. Book writing. revision of the traditional selection of content. emphasizing basic concepts. attention to macro-analysis. reduce the computational difficulty of outstanding engineering applications. focusing on vocational skills and quality of training. pay attention to the contents of a simple and easy to understand. and with the corresponding teaching packages. easy to teaching and learning. Book-and-through modular combination of written. taking into account recent machine. near the soil types of professional needs. The book is divided into two volumes. The first volumes. covering the original theory of mechanics and mechanics of materials two main courses. including Introduction. rigid body static analysis based on plane system of forces. elastic deformation of the body of static analysis based on the force rod. bar stress and strength. deformation and stiffness of the rod. strut stability. mechanical movement based on dynamic load and the alternating stress. The second branch contains the main elements of structural mechanics. including the introduction. geometric composition analysis. statically determinate structure of the internal forces and displacements. internal forces of statically indeterminate structures. matrix displacement method. structural calculations and other issues. Thinking questions after each chapter and exercises. exercise book with the answer. This book can be used for more Contents: Chapter 1 Introduction 1-1 Engineering Mechanics. the basic task of the study and engineering mechanics in 1-2 the mechanical model of thinking and research methods questions...
