Introduction to Theoretical Astrophysics

By Dr. Igor Stepanovich Makarov

CreateSpace Independent Publishing Platform. Paperback. Book Condition: New. This item is printed on demand. Paperback. 110 pages. Dimensions: 9.0in. x 6.0in. x 0.2in. This is a textbook for university students, postgraduate students, physicists and researchers. It may be useful for philosophers and scientists of other fields. Modern theoretical physics is based on a number of fundamental theories, methods and interpretations of the vast collection of experimental data. Maxwells electromagnetic theory, quantum mechanics and the theory of relativity seem to be most fundamental. However those theories have proved unable to solve the most cardinal problems of physics, such as the origin of matter, the physical nature of space, the nature of nuclear interaction, the structure of the atom, etc. Fortunately, the solution to the crisis has been recently suggested by philosophy. It became clear that physics is a theoretical science, a thoughtful cognizance of the nature; its language is mathematics, its philosophy is that of the nature itself the systems theory described and presented in the most completed form in Hegels Encyclopedia of Philosophical Sciences. This textbook offers university students a new course on theoretical astrophysics based on the authors research which seems to have initiated the reform of modern physics, revealing...
